

# No More Bacteria, No More Odor!

## What is EM®?

EM®, or Effective Microorganisms®, is an effective mixture of photosynthetic bacteria, lactobacillus, and yeast cell that is both non-toxic and eco-friendly. EM® also creates antioxidants through an effectuation process among the various microorganisms' complex symbiotic co-existence. These antioxidants have powerful abilities to restore and revive environment subjected to spoilage and pollution.

Introducing  
Effective  
Microorganisms®  
**EM®**

Used for  
Hydrocarbon,  
Perc, Laundry,  
Wet Cleaning  
systems

EM® is an all-natural blend of beneficial micro-organisms that cleanse and revitalize by breaking down organic matter.

Dc500™ is the original authentic EM® that can be used among Hydrocarbon, Perchloroethylene, and Laundry Systems. No more worries to remove Bacteria and Odor from drycleaning machines. Now, Dc500™ will keep your facility and environment clean and healthy!

## Dc500™ ORIGINAL AUTHENTIC

Dry Cleaning & Laundry Treatment Concentrate

### What is Dc500™?

Dc500™ is an eco-friendly microorganisms® solution that is natural and organic and does not contain any harsh chemicals. There are no chemicals, no sticky residues or strains on clothes and eliminates any odor stemming from the hydrocarbon solvent used in modern drying cleaning machines. It also eliminates bad odor from the wash load naturally instead of disguising it.

### The effect of Dc500™ EM® Activated Solution

1. Dc500™ will naturally break down all types of bacteria and odor-causing molecules residing in the hydrocarbon cleaning machine.
2. Dc500™ will remove foul odor from the laundry and improve the cleaning power of the detergent.
3. If Dc500™ is added to the scrub solution for shirt collars, it will remove not only the odor but also effective on heavy soiled area.

### Directions

#### For dry cleaning machine:

**Step 1:** Pre-condition: Charge 2 oz. of Dc500™ for every 10 gallons of for each tank once.

**Step 2:** Add 2 oz of Dc500™ into reserve tank for 50 pound of cleaning machine daily.

(Add 3 oz into a water separator or use 1~2 oz per load into a button trap if the reserve tank is not accessible to charge)

Dc500™ can be used for both hydrocarbon machine and perc machine.

#### For laundry machine:

Add 2 oz. of Dc500™ with a normal amount of detergent for 50 lbs load.

#### For shirt collar and cuff scrub:

Mix Dc500™ with existing laundry pre-treatment or detergent solution in a ratio of 1 : 100.
